Early-Stage Researchers

Getting to know a bit more who NewFrac is

Getting to know a bit more who NewFrac is, our Early-Stage Researchers have been introduced in our social media profiles with the hashtag [#meetnewfrac](#).

📷 Have a look to NewFrac's instagram [HERE](#).

During this period the first secondments stays have started and finished, improving, and linking the relationship between ESRs in the NewFrac Framework.

"Hi! I am Sara, ESR3. I came from Paris to Sevilla to make a secondment during 3 months. I had to opportunity to meet other ESRs there, which was amazing, we are now really good friends! During that time I changed from Finite Fracture Mechanics to Phase Field, seeing my research from a different perspective. It is an opportunity to exchange ideas between research groups and students, and also to make new friends!"

Sara Jimenez

Main Events

EVENTS:

PRO School (7-11 Feb 2021):

It was held in a hybrid mode due to the covid situation.

The PhD students arrived in Lucca to attend the NewFrac Pro School, an advanced training school funded by the European Commission and organised by IMT School for Advanced Studies Lucca.

The training module was opened for participation outside de NEWFRAC training network to promote the exchange with young researchers from industry and academia.

Find the flyer [HERE](#).

NoiTv Lucca - PRO School visit to Technological Pole of Lucca.

Watch it [HERE](#).

Following their agenda, they visited the technological pole of lucca on wednesday 9th February.

UPCOMING EVENTS:

Workshop-2
